

This is your invitation!

**Come to the first International Congress on
Future Community Life**

What On Earth Can We Do Together in 2 x 7 Days?

1st Week: December 18 2009 – December 25 2009

2nd Week: December 26 – January 2nd 2010

Let's come together now to make a difference in the future

December and January is going to be an exciting time in Jericho as local citizens and visitors from all over the world come together to create a vision of future community life.

1st Week: December 18 – December 25 2009

Young adults and children will build on visions of their future life and the community they want to live in. The results will be presented to the municipality and interested organisations at the end of the week. Creativity, music, artwork and a lot of fun throughout the week!

2nd Week: December 26 – January 2nd 2010

As experts and laypeople from all over the world work together with local residents on their ideas and projects we create **a blueprint** for future civic life together.

Join us in the oldest city on earth for a **dynamic experiment**:

a series of events include environmental plans and actions, collective health and healing, science and economy and family and social life. It will be an in-depth exploration of civic life on many levels and a chance to apply our ideas in a practical way to the city.

Jericho is the template; the work we accomplish during these 2 x 7 days is to be an inspiration to other communities worldwide.

What Can We Do Together In 2 x 7 Days?

- We work on visions, designs, ideas and projects and get immediate feedback.
- As experts and laypeople we share our knowledge in smart groups.
- We offer our skills in practical projects.
- We experience life in a different culture and we come together with people from all over the world.
- We deal with freedom and responsibility by being part of self-organising groups.

More information and signing in procedure: www.together21.org

We ask you to please tell your family, your friends, your teachers and your students, your colleagues and your staff about this exiting experiment. We will experience unforgettable days in Jericho. Make sure to be there with us or send your representatives.
